T. SAKATA & CO. GIVE NO WARRANTY, EXPRESS OR IMPLIED, AS TO PURITY, DESCRIPTION, QUALITY, PRODUCTIVENESS OR ANY OTHER MATTER OF ANY SEEDS AND BULBS THEY SEND OUT AND THEY WILL NOT BE IN ANY WAY RESPONSIBLE FOR THE CROP

Gentlemen:

We have pleasure in presenting 1936 Tree and Perennial Plant Seed List, and hope to be favored with your order at an early date.

This year we are expecting a good yield in general line of tree seeds and that we can take care of your order in satisfactory manner.

We have added to the list a few more items which we believe will interest you. Also refer to the Specialty Pages 2-8, in which you will find good many items of merits.

"Quality Seed", we believe, is what you are looking for. From us you can expect the most dependable seed that is procurable in the Orient. All seeds we ship out are passed through our Laboratory, where vitality and trueness are carefully checked.

Our Agents, Messrs. HERBST BROTHERS, 92 Warren St., New York, N.Y., will be pleased to transmit to us your order: they are always intent upon furthering mutual interests and shall be glad to communicate to us your wishes.

We thank you for your past patronage and look forward for your further commands.

Yours faithfully,

T. SAKATA & COMPANY

Yokohama, Japan.

August, 1936.

Terms of Sale

DISCLAIMER: We give for ourselves or our principals no warranty expressed or implied, as to the description, quality, productiveness, or in any other respect for the seed we deliver, nor will we be responsible for the crop in any way. In no case shall we or our principals be held liable for more than the invoice value of the seed sold.

QUOTATIONS are based on an average crop and normal cost of collecting and preparing the seed. If through unforeseen contingencies the cost of any item is extraordinarily increased, we reserve for ourselves and our principals the privilege of advancing proportionately the price of such items of accepted orders, subject to the buyers' option to acquiesce or cancel the items affected.

PRICES are F.O.B. Seattle. They include import duty, fumigation costs and all Custom House charges.

WEIGHTS are net. Containers are charged at cost.

DELIVERY is always subject to crop-out-turn and arrival in good condition from the source.

PURCHASES of less than $\frac{1}{2}$ lb. of any one item will be billed at 25% over the pound price. Minimum orders for any one item 4 ozs., except where otherwise indicated; minimum charge 25¢.

PAYMENT: Our prices are calculated on a strictly cash basis; customers remitting with their orders will be allowed 5% discount.

Buyers will kindly indicate the routing desired, which will be followed as far as possible; otherwise we will use our best judgment in shipping, always subject to the buyer's responsibility after delivery to carrier.

This offer expires October 31st, 1936.

HERBST BROTHERS,
Agents for T. Sakata & Co.

SPECIALTIES

WE INVITE YOUR APPLICATION FOR LARGE QUANTITY.

CASTANEA MOLLISSIMA (Korean Chestnut), resistant type

Blight resistant hardy chestnut widely recognized by foresters. The nuts are sweeter and larger than native varieties. The seed should be ordered early.

55 ¢ lb; \$ 4.00 10 lbs.

IMPORTANT

We supply only newly harvested Pear seed which vitality is thoroughly examined in our Laboratory. We therefore do not take any further responsibility as to the germination of our seed when planted in the field. We book all orders only on that understanding.

If our customers are not satisfied with our seed, it must be returned to our Agents within 5 days it is delivered.

PYRUS SEROTINA

Wild Japanese Pear. A blight resistant type, rapid in growth and an excellent understock. Very popular in our Southern States. The seed should be ordered early.

\$ 2.00 lb; \$ 18.00 10 lbs.

PYRUS USSURIENSIS (Cultivated)

Embodies all of the advantages of the wild variety and in addition, produces an astonishingly even top growth. The seed should be ordered early.

\$ 2.40 lb; \$ 22.00 10 lbs.

ABIES HOMOLEPIS (brachyphylla), Nikko Fir

A tree of rare gracefulness. Perfectly hardy in the Arnold Arboretum. It frequently grows to 120 feet with wide-spreading branches, dark green leaves which are silvery on the underside. One of the handsomest of all Silver Firs.

\$ 1.00 lb; \$ 9.00 10 lbs.

Unless specified, our seeds are always cleaned either out of hulls or berries. Such seeds are far economical for the nurserymen than uncleaned seeds.

ABIES VEITCHII (Veitch Fir)

Less tall than the above with a smooth, pale gray bark and short, horizontally spreading branches clothed with dark green leaves silvery on the lower surface.

\$ 1.50 lb; \$ 13.50 10 lbs.

CHAMAECYPARIS OBTUSA (Hinoki Cypress)

Very popular and highly valued for timber in Japan. Also valuable as ornamental.

70 ¢ lb; \$ 6.50 10 lbs.

GINKGO BILOBA (Maidenhair Tree)

The sole survivor of a preglacial group. Makes a magnificent, picturesque, upright shade tree and is always in good demand. Ginkgos are noticeably free from insect damage. The nuts are edible. **Orders should be placed immediately.**

35 ¢ lb; \$ 3.00 10 lbs.

JUNIPERUS CHINENSIS (Chinese Juniper)

More often assumes the form of a medium sized, broadly pyramidal tree than that of a slender branched shrub. Some specimens reach a height of 60 feet. The foliage consists of two kinds of leaves, narrow and closely appressed scalelike ones, and pointed, linear, spreading needles. Highly recommended for landscape planting as it does remarkably well in cultivation, withstanding extremes of cold, heat and drought.

\$ 1.60 lb; \$ 14.50 10 lbs.

LARIX LEPTOLEPIS (Japanese Larch)

Its quick growth and blight resistance is attracting American and European foresters. A good crop is expected this year and high quality seed will be suppliable. **For large quantity, please write for current price.**

\$ 3.00 lb; \$ 27.00 10 lbs.

PINUS KORAIENSIS (Korean Pine)

Mr. Sakata calls special attention to the handsome and dense habit of this Pine. An outstandingly fine species.

60 ¢ lb; \$ 5.40 10 lbs.

SCIADOPYTIS VERTICILLATA (Japanese Umbrella Pine)

Most notable conifers that can be grown in the climate of Mass. It is of dense, pyramidal habit with ascending-spreading branches. The leaves are borne in clusters around the stem, one tier above another, suggesting a parasol, hence its common name. They unfold bright green but soon change to black-green and remain so throughout the winter. The strap-shaped leaves, each from 3 to 4 inches long, are thick and leathery in texture with a white line on the under side. It likes a cool situation and good soil. On account of its great hardiness and distinct appearance nurserymen ought to raise it in quantity.

\$ 1.85 lb; \$ 16.00 10 lbs.

TAXUS CUSPIDATA (Japanese Yew)

Not only is production from seed cheaper than from cuttings, but it results in more shapely upright plants. Culture is very simple. Perfectly hardy.

75 ¢ lb; \$ 7.00 10 lbs.

ACER PALMATUM (Japanese Maple), small seeded type

The small seeded has invariably produced stronger grafting stock and more seedlings per pound of seed. Best understock for grafting.

\$ 1.20 lb; \$ 10.50 10 lbs.

AMPELOPSIS TRICUSPIDATA (Veitchi), Japanese Creeper

A most popular vine plant. It clings firmly to wall, which turns scarlet orange in fall, is particularly attractive.

\$ 1.65 lb; \$ 14.50 10 lbs.

AZALEA KURUME, mixed colors

Few Azaleas can beat Kurume in beauty. It contains a vast range of most fascinating brilliant shades as well as intermediate colors. Single, as well as semi-double flowers. We collect our seed from beautiful garden collections.

\$ 1.00 pkt; \$ 5.35 oz.

AZALEA MOLLIS, mixed colors

Collected from an assortment of various colors such as pure yellow, orange red, brownish red, etc.

70 ¢ oz; \$ 2.00 $\frac{1}{4}$ lb.

AZALEA SCHLIPPENBACHII (Royal Azalea)

A sturdy bush of upright habit, bearing on naked twigs terminal clusters of large pure pink blossoms. A very hardy deciduous Azalea desirable to all gardens.

\$ 1.50 oz; \$ 4.00 $\frac{1}{4}$ lb.

BERBERIS THUNBERGII

One of the most valuable species, especially remarkable for its low, dense, horizontal growth, its large brilliant red fruits, remaining fresh till the following spring, and for its bright scarlet fall coloring, hardy. Very valuable for borders of walks and drives and for low ornamental hedges.

\$ 1.35 lb; \$ 12.00 10 lbs.

CAMELLIA JAPONICA DOUBLE-FL., mixed colors

Double flowered of the Japanese Camellia. Collected from garden varieties.

\$ 1.50 lb; \$ 13.50 10 lbs.

CERCIS CHINENSIS (Redbud)

Grows to 45 feet with a trunk of 5 feet in girth. The foliage in autumn assumes fine tints. It blooms freely and the flowers are larger and better colored than most of the other varieties.

\$ 2.25 lb; \$ 20.00 10 lbs.

CLEMATIS PANICULATA (Virginia Bower)

Beautiful climbers for the shady side of the house or the trellis. Water and hoe them frequently in the summer for best results. Flowers white, very profusely produced in late summer.

\$ 1.95 lb; \$ 16.50 10 lbs.

CORNUS KOUSA (Kousa Dogwood)

Comes to flower mid-June. Its upstanding heads on rigid slender stalks are covered with rich green leaves. Copious floral heads, each from 5 to 6 inches across, last for full a month before turning scarlet. **Order early.**

80 ¢ lb; \$ 7.20 10 lbs.

CYDONIA JAPONICA PYGMAEA (Dwarf Flowering Quince)

Similar to *C. japonica* (Flowering Quince) in brilliancy of flower and fruit, but of dwarf and creeping habit. Highly recommended for rock gardens. Easy to grow from seed.

70 ¢ lb; \$6.30 10 lbs.

EUONYMUS ALATUS (Winged Euonymus)

Turns brilliant-red in the autumn. Berries also turn to bright red. Very showy.

75 ¢ lb; \$7.00 10 lbs.

ILEX CRENATA (Japanese Holly)

A small tree with small thick glossy foliage similar to Boxwood. Lends itself to specimens and hedgework and may be trimmed frequently.

90 ¢ lb; \$8.00 10 lbs.

MAGNOLIA CONSPICUA (Yulan)

Ours is true strain. **Order early.**

\$2.60 lb; \$24.00 10 lbs.

MAGNOLIA KOBUS (Japanese Magnolia)

Many nurserymen have trouble in starting the seed but we can supply such Kobus seed which is sure to germinate. They are harvested with utmost care and dried in such manner that they do not fail to germinate. Customers must plant our seeds immediately on their arrival.

\$1.30 lb; \$12.00 10 lbs.

MAGNOLIA LILIFLORA

A large flowering Magnolia. The flower is even larger than Yulan but with dark purple-red color.

\$2.60 lb; \$24.00 10 lbs.

NANDINA DOMESTICA RED

One of the most beautiful of red berries in Japan. Usually they attain from 3 to 6 feet high making standard appearance as they lose their foliage from the bottom. The brilliant red berries born on the top part of the plant in very heavy clusters which easily measure more than foot long covered by hundreds of good sized round berries of most brilliant red imagined. Easily can be grown from seed and comes to berry within a few years.

\$1.00 lb; \$9.00 10 lbs.

PRUNUS INCISA (Mame Cherry)

Absolutely hardy in the Arnold Arboretum and rivals *P. subhirtella* in abundance of blossom. As the petals fall, the calyx become bright colored and adds fully a week to the Spring beauty of this tree.

\$1.75 lb; \$16.00 10 lbs.

PRUNUS LANNESIANA (Hitoye Cherry)

One of the principal parents of the double-flowered Japanese Cherries. Pure white blossoms, each about 1½ inches in diameter, borne several together in fascicles are crowded toward the ends of the branches. The flowers are fragrant.

\$1.00 lb; \$9.00 10 lbs.

PRUNUS SERRULATA (Oriental Cherry)

Another parent to a large group of hardy double flowering varieties. The low price of the seed permits its extensive use as understock.

\$ 1.00 lb; \$ 9.00 10 lbs.

PRUNUS SERRULATA SACHALINENSIS (Ezo-Yama Cherry)

Also known as Sargent Cherry. Native of northern Japan and, therefore, perfectly hardy. Flowers are rich rosy pink, fading to pink and the largest of all Japanese Cherries. Very hardy.

\$ 1.75 lb; \$ 16.00 10 lbs.

PRUNUS SUBHIRELLA (Spring Cherry)

One of the most beautiful of all the lesser flowering trees. It is an extra early flowering variety and exceedingly floriferous year after year, and its blossoms last longer than those of other single flowered types. At first pink, the flowers become lighter with age, until, when ready to fall, they are almost white. Flowers already in March/April.

\$ 2.00 lb; \$ 18.00 10 lbs.

PRUNUS TRILOBA (Flowering Plum)

Makes a broad bush. 12 feet high and 20 feet in diameter. Its slender rigid stems are densely packed with Double Rose-like pink blossoms.

\$ 1.20 lb; \$ 11.00 10 lbs.

PRUNUS YEDOENSIS (Yoshino Cherry)

"This is the Cherry," wrote Mr. Wilson, "so generally planted in the parks, temple grounds, cemeteries and streets of Tokyo. Its flowering is the occasion of a popular festival in the city of Tokyo." The blossoms are white flushed with pink.

\$ 1.75 lb; \$ 16.00 10 lbs.

PUERARIA THUNBERGIANA (Kudzu Vine)

For large quantity price on application.

The use of this plant as a forage crop is highly recommended. The U. S. Department of Agriculture went to the expense of sending representatives to the Orient to further study it. To quickly establish a field, the use of seedlings has been found advisable due to its slow initial development. Particularly in the Southern States, where the plant is best known, the growing of seedlings should prove profitable. Being of rapid growth, it makes a good cover.

\$ 1.45 lb; \$ 13.00 10 lbs.

RHAMNUS DAVURICA (Dahurian Buckthorn)

The loose, irregular, horizontal branching habit of the Dahurian Buckthorn is the plant's outstanding characteristics although its firmly textured, narrow-elliptic to oblong, deep green leaves, are quite a bit larger than those of most species. The flowers and fruit are much alike those of *R. cathartica*.

\$ 3.00 lb; \$ 27.00 10 lbs.

RHODOTYPOS KERRIOIDES (Jetbead)

Resembles *Kerria japonica* but with white flowers. A handsome and distinct shrub, hardy as far north as Mass, with bright green foliage.

\$ 1.25 lb; \$ 11.00 10 lbs.

Unless specified, our seeds are always cleaned either out of hulls or berries. Such seeds are far economical for the nurserymen than uncleaned seeds.

ROSA MULTIFLORA

Useful understock and ornamental. Perfectly hardy in the Northern States. Pure white flowers are borne in great profusion. Excellent for mass plantings and embankments. For large quantity, please write for current price.

45 ¢ lb; \$ 4.00 10 lbs.

ROSA MULTIFLORA THORNLESS

We collect seeds from only thornless trees but all seedlings are not like their parents. However, good many percentage are thornless. The best way is to make cuttings from these thornless seedlings.

\$ 1.00 lb; \$ 9.00 10 lbs.

ROSA RUGOSA

For seashore gardens this is one of the best of all plants. In Japan it is known as the Sea-Tomato— a very apt name, when its natural habit and its fruits are remembered. Larger all way through than R. multiflora.

55 ¢ lb; \$ 5.00 10 lbs.

ROSA WICHURAIANA

A handsome rose for covering banks and rockeries, with polished, dark green leaves on creeping branches and pure white, fragrant blossoms.

55 ¢ lb; \$ 5.00 10 lbs.

STYRAX JAPONICA (Japanese Snowbell)

The bell-shaped flowers are borne in cymose clusters at the end of every branchlet and the corolla is of pure, waxy white. No other tree has such an abundance of bloom. Grows freely from seed.

75 ¢ lb; \$ 7.00 10 lbs.

VIBURNUM CARLESII

It germinates well after stratification. Seedlings are cheaper than grafts and produce natural well shaped plants. They are finest and most fragrant clove scented Viburnum from Korea. Flowers waxy in texture, pink tinted in bud and pure white when fully opened. Flowers make a rounded and conspicuous clusters.

\$ 2.80 lb; \$ 26.00 10 lbs.

WISTERIA SINENSIS

Attractive large twiners with pea-shaped flowers, planted for covering porches, arbors, and buildings: the noblest of the woody vines. Bloom in May.

Blue flowering \$ 1.00 lb; \$ 9.00 10 lbs.

White flowering 2.60 lb; 23.00 10 lbs.

DIANTHUS SUPERBUS ALBUS

Lately, the lovely pink-flowered Dianthus superbus has become very popular. Now we are glad to add a pure white sport which is identical to its parents excepting color. This has delicious fragrance.

\$ 1.00 pkt; \$ 5.00 oz.

DIANTHUS SUPERBUS ROSEUS

Much dark-rose flowering sport of the type. Up to 80% comes true to colors.

\$ 1.00 pkt; \$ 4.00 oz.

FLOWERING KALE, mixed colors

In young stage its leaves are green just like ordinary Kale, but in autumn as the weather advances remarkably beautiful colors such as white, cream, pink, rose, magenta, etc., begin to appear on dark green ground.

As the plants grow, the colors become more brilliant and keep well into winter until late spring.

Sakata's strain is better in color, more compact in habit which makes it more suitable for pot plant than the old loose and tall growing Coleus-leaved or variegated-leaved Kale.

Considering its conspicuous color and its marvellous keeping quality, this Flowering Kale should gain great popularity as pot plants for X'mas or New Year decoration or as bedding out plants for winter and spring borders.

Cultural notes :

Seed is sown in seed bed in April to May. Transplanted two or three times as they grow on. By the middle of Nov. they are planted out in bed 1½ ft. apart, or planted singly in pots using 8 or 10 in. pots. Do not apply too much fertilizer at the time of final shifting, as such will delay the coming of color.

For other points do just as you will grow Cabbage or Kale. Where climate is very cold it is better to stow in a cold frame or under shed to ward off frost.

70 ¢ oz ; \$ 2.00 ¼ lb.

IRIS KAEMPFERI

Undoubtedly the finest of all Iris family. Especially so, as this seed is collected from famous collection, cultivated for exhibition purpose.

40 ¢ oz ; \$ 1.00 ¼ lb.

LILIUM PHILIPPINENSE FORMOSANUM WHITE-FLOWERED STRAIN

Flowers within six to eight months from seed. Seedling of February to March already comes into flower in September the same year. Under moderate climate keeps on flowering continuously year after year. Excellent both for pots and for garden, also invaluable for cut flowers. Produces good percentage of pure white-flowers.

\$ 2.00 oz ; \$ 5.00 ¼ lb.

PAEONIA CHINENSIS DOUBLE-FL., mixed

Famous Peony of Japan, collected from fine garden varieties.

\$ 3.50 lb ; \$ 30.00 10 lbs.

PAEONIA SUFRUTICOSA (Moutan)

Double Tree Peony mixed. Our collection is done only from cultivated double flowering sorts of the most beautiful colors and shapes.

\$ 7.00 lb ; \$ 60.00 10 lbs.

SCABIOSA FISCHERI

An attractive Scabious of Manchurian origin, easy to grow and a long-lived perennial. Height about 2½ feet and requires no stake, being neat and tidy habit. Flower is 2½ inches across and is beautiful blue-purple color not easy to describe. Flowering growths are clothed with smaller, finely cut foliage up to the height of a foot or more, these ending in a long, naked flower stem which makes the plant a useful subject for cutting.

50 ¢ pkt ; \$ 1.50 oz.

*Unless specified, our seeds are always cleaned either out of hulls or berries.
Such seeds are far economical for the nurserymen than uncleaned seeds.*

p	GRANDIFLORA PRAECOX GIGANTEA..50	2.00
<i>An extra early flowering Platycodon with most gigantic size. Individual flower measures as large as 4 inches across and starts flowering already in June. Seed when planted in April-May starts flowering from August on until frost kills them. They grow up over 2½ ft. from roots but from seeds, they start flowering at the height of 5 inches. We can supply both in blue and in white color. From seed they show some percentage of variation in color and in size. We consider this to be a startling novelty.</i>											
POLYGONUM											
p	sachalinense	—	.50

We supply the wild plant seeds either in Cleaned or in Uncleaned Seeds according to the variety.

OSTERDAMIA JAPONICA (Zoysia japonica)

One of the hardy perennial Lawn Grasses, suitable for Golf Courses, Embankments and Airports.

Prices ; \$3.00 10 lbs, \$25.00 100 lbs.

Sakata's All-Double Petunias

Producing practically 100% double flowers

Since we introduced the "ALL-DOUBLE or 100% Double-fl. GIANT FRINGED PETUNIA" seed into the market, we have done everything possible to improve it, both in color and size. We have also done our best to eliminate the small-flowering doubles.

We are now, therefore, able to offer such seeds which, not only grow 100% double-flowering plants, but also produce flowers of immense size. These flowers show a wonderful assortment of beautiful colors, such as Carmine, Brilliant Rose, Velvety Purple Violet, Purple, White, Creamy Yellow, and innumerable intermediate as well as variegated colors. These flowers, which are exquisitely fringed and duplexed as shown in the picture, very often measure as much as 5 inches across.

We have the following types ;

"Triumphant"	Tall Giant Fringed type
"Victorious"	Dwarf Giant Fringed type
"Superb"	Tall Peony-fl. type
"Dwarf Superb"	Dwarf Peony-fl. type
"Glorious"	Tall Carnation-fl. type
"Dwarf Glorious"	Dwarf Carnation-fl. type

For detail, please apply to Messrs. Herbst Brothers.

*Any other varieties not listed in this list, prices on request.
Special prices on larger quantities*

Cultural Notes

Tree seed planters often attribute lack of success to the seed, which, although viable often fail to germinate by reason of improper sowing. To prevent such failure we give a few important cultural notes which we invite those of our customers who have no experience in tree seed culture to read carefully.

Seeds having a hard skin or shell often remain for a year, or even longer, dormant in the ground. They may come up during the following season or even two or three years later.

To succeed with tree seed it is important to keep the seed bed sufficiently moist but not too wet, as this may lead to "Damping off," especially in the case of coniferous seedlings. The seed bed must be of well drained loamy soil sufficiently sandy to prevent fungus attacking the seedlings. Shading is necessary, especially for the delicate sorts. We recommend the use of disinfectants of which numerous brands have recently come on the market.

Generally speaking, tree seed does not carry well in warm places; it should be at once placed in cold storage if it cannot be immediately used. Even then it often will not carry safely from season to season.

Many sorts lose their germination quickly, especially *Ulmus*, Cherries, small-fruited *Prunus*, Mulberries, *Elaeagnus*, etc. These should be kept only in cold storage.

It is physically impossible to treat conclusively in a few lines the subject of tree seed germination. To all, even experienced growers of seedlings, flowering Cherries and stone fruited plants, we can recommend Bulletin No. 569 of the New York State Agricultural Experiment Station at Geneva, N. Y., by Dr. H. B. Tuckey. In this Bulletin you will find this subject treated fully and practically.

Growers of Conifers and Shrubs will do well to keep posted on the Bulletins of the Boyce Thompson Institute.

We may recommend specially Dr. William Crocker's Bulletin No. 15, dated March, 1930, copies of which may be secured, we believe, from the Boyce Thompson Institute for Plant Research, 1086 North Broadway, Yonkers, New York.

The following pointers may be of service to the nurseryman. They are based on our own experience but should be changed as conditions seem to require.

Abelia	Diervilla	Rhododendron	} Sow in peat moss or fine leaf mould in well protected seed bed.
Alpine Plants	Enkianthus	Ribes	
Andromeda	Lagerstroemia	Tamarix	
Azalea	Ledum	Tripetaleia	
Buddleia	Leucothoe	Weigela	
Corylopis	Menziesia		
Deutzia	Phyllodoce		
Carpinus	Hovenia	Pterocarya	} Sow as soon as possible after seeds are received.
Clerodendron	Malus	Ulmus	
Disanthus	Meliosma	Zanthoxylum	
Edgeworthia	Prunus		
Aesculus	Cinnamomum	Lagerstroemia	} Sow in autumn or when seed arrived.
Alnus	(in warmer climate)	Ligustrum	
Amygdalus		Prunus triflora	
Caragana	Cornus	Sapindus	
Chamaerops	Corylus	Syringa	
(in warmer climate)	Forsythia	Tilia	
	Fraxinus		

Acanthopanax	Diospyros	Lycium	} Sow in early spring.
Actinidia	Euptelea	Paeonia	
Ailanthus	Euscaphis	Podocarpus	
Akebia	Exochorda	Pyrus	
Amelanchier	Fagus	Rhus	
Amorpha	Gleditschia	Sambucus	
Berberis	Illicium	Schizophragma	
Catalpa	Indigofera	Skimmia	
Celtis	Juglans	Sophora	
Cercidiphyllum	Juniperus	Staphylea	
Chloranthus	Kerria	Stauntonia	
Clematis	Koelreuteria	Stewartia	
Daphniphyllum	Lespedeza	Symplocos	
Abies	Hibiscus	Rhaphiolepis	} Sow in spring after danger of frost is past and soil is warm.
Acer	Hydrangea	Rhodotypos	
Aleurites	Idesia	Robinia	
Ampelopsis	Ilex	Schizandra	
Aralia	Larix	Sciadopitys	
Benzoin	Lonicera	Smilax	
Betula	Maackia	Sorbaria	
Bischofia	Machilus	Sorbus	
Buxus	Magnolia	Spiraea	
Callicarpa	Mallotus	Stachyurus	
Camellia	Melia	Styrax	
Celastrus	Michelia	Taxus	
Cephalotaxus	Micromeles	Taonabo	
Cercis	Myrica	Thuja	
Chamaecyparis	Nandina	Thujopsis	
Citrus	Paulownia	Torreya	
Cladrastis	Phellodendron	Trochodendron	
Clethra	Philadelphus	Tsuga	
Crataegus	Photinia	Vaccinium	
Cryptomeria	Picea	Viburnum	
Cydonia	Pinus	Vitis	
Elaeagnus	Pittosporum	Wisteria	
Euonymus	Platycarya	Zelkova	
Gardenia	Pterostyrax	Zizyphus	
Ginkgo	Pueraria		
Hemipteleia	Punica		
Acer	Fagus	Pyrus	} Stratify before sowing; seeds germinate slowly.
Akebia	Hamamelis	Prunus	
Amelanchier	Ilex	Rhus	
Ampelopsis	Juniperus	Ribes	
Berberis	Koelreuteria	Rosa rugosa	
Buxus	Lonicera	Rosa Wichuraiana	
Cephalotaxus	Magnolia	Sorbus	
Celtis	Melia	Staphylea	
Cydonia	Michelia	Styrax	
Clematis	Micromeles	Taxus	
Crataegus	Nandina	Viburnum	
Diospyros	Ostrya	Vitis	
Elaeagnus	Paeonia Moutan	Zanthoxylum	
Exochorda	Photinia		
Albizzia	Cercis	Pueraria	} Soak in tepid water just before planting.
Buxus	Gleditschia	Robinia	
Camellia	Ilex	Rosa	
Caragana	Photinia	Sophora	
Ardisia	Kadsura		} Sow under glass.
